

12 VOLT COMPRESSOR, MAX 10 BAR MANNESMANN – GERMAN

12 VOLT COMPRESSOR, MAX 10 BAR MANNESMANN – GERMAN

Supply voltage: 12 V

Maximum pressure: 10 bar / 140 psi

Working pressure: 7 bar

Efficiency: 35 l / min

Maximum working time at working pressure higher than 5 bar: 6 min.

Minimum interval between successive pumping cycles: 15 min

The compressor is equipped with a nozzle adapted for pumping through a standard car valve.

The use of a compressor to supply a pneumatic set requires additional connections

[supply connection for own supply from the compressor for 1 pressure gauge with valve](#)

[supply connection for own supply from a compressor for 2 pressure gauges with valve](#)

Manufacturer – Mannesmann, Germany
